SIGNATURE TOPICS

AI Is the New Blast Radius

Securing AI apps, agents, prompts, models, and data without slowing innovation.

If It's Reachable, It's Breachable

How attackers find, classify, and exploit exposed systems — and how Zero Trust changes the game.

From Cloud to AI Transformation

Lessons from cloud adoption before AI repeats the same mistakes at 10x speed.

Zero Trust Everywhere

Why the network is no longer the control point and what modern architecture looks like now.

The Browser Is the New Battlefield

Safely enabling employees, vendors, and third parties where work actually happens.

Cybersecurity Without the Corporate Ambien

A fast, funny, plain-English look at the trends reshaping security and risk.

WHAT PEOPLE SAY

"We brought Brian in to speak at our executive summit and the feedback was unanimous — best session of the day. He doesn't do fluff."

— Angela M., CEO — Cybersecurity SaaS Company

"Brian's ability to translate complex security architecture into business outcomes is unmatched. He's the person I call when I need someone who can speak to the board and the engineering team."

— Rob S., CTO — Healthcare Enterprise
